4. Other Risks related to Cryptocurrencies

4.1. The Client acknowledges and accepts that trading and/or dealing with cryptocurrencies and/or CFDs on cryptocurrencies is complex, extremely risky and usually highly speculative. The cryptocurrency market is a dynamic area, and its respective prices are often highly unpredictable and volatile due to execution issues and industry specific disruptive events, including but not limited to discontinuation and regulatory bans. As with any asset, the value of digital assets can increase or decrease and there can be a substantial risk that the Client loses money buying, selling, holding or investing in digital assets.

4.2. Cryptocurrencies as an underlying asset are traded on non-regulated decentralized digital exchanges and usually their value is affected by parameters which are outside the scope of influence of regulatory bodies and are based on internal rules of the particular digital exchange they are traded on. For this reason, the value of cryptocurrencies is highly volatile and can dramatically increase or decrease within a day. When trading and/or dealing with cryptocurrencies and/or CFDs on cryptocurrencies the Client should consider the risks involved and that there are numerous parameters which can fluctuate the price of cryptocurrencies and/or CFDs of Cryptocurrencies.

4.3. FXGT.com derives its market and pricing data on cryptocurrency from the digital decentralized exchanges they are trade on. The Client should consider before trading that due to the non-regulated nature of these exchanges, FXGT.com will receive market and price feeds in accordance to the internal rules and practices of these exchanges which are not regulatorily supervised and potentially might be altered by the digital exchange's discretion from time to time. The above can result to adverse effect on the open positions the Client has with FXGT.com on cryptocurrency which could potentially lead to partial or whole loss of his investment capital.

- 4.4. Cryptocurrencies are not appropriate for all investors. The Client should consider before trading and/or dealing with cryptocurrencies whether he can tolerate the significantly higher risk of loss to his investment capital which may occur over a short time frame resulting from sudden adverse price movements of cryptocurrencies.
- 4.5. FXGT.com may elect to execute any order and/or hold any money and cryptocurrencies via a third party. Such third parties are not banks that hold their money/digital assets as a deposit. If any such third party loses any money, fails or goes out of business, there is no specific legal protection that covers the Client for losses arising from any funds he may have held with such a third party, even when such party is registered with a regulatory authority. FXGT.com will not be responsible in the event of losses caused by those third parties.
