HOW TO SETUP YOUR FXGT SPONSORED MT4 VPS

Step 1 _____

Go to your **registered FXGT.com email account** and locate the **MT4 VPS Credential email** we sent you, containing your **MT4 VPS IP address, username,** and **password**

Step 2 _____

From your computer, click on the **Start** menu, type **Remote Desktop Connection,** and open the app

	Ċ	
Image: All Work Apps Documents W Best match Remote Desktop Connection 2 Settings RemoteApp and Desktop 2 Settings Search work and web Premote desktop - See work and web Premote dest Premote dest Premote dest Premote dest		

In the pop up box, enter the **IP address** of your VPS (from Step 1) in the **Computer** field and click **Connect**

Step 4 _

In the Windows Security pop up box, enter the **username** and **password** from Step 1 and click **OK**

••• <>	E Q	5	10+
	Windows Security	×	
	Enter your credentials		
	These credentials will be used to connect t	to	
	User name		
	Password		
	Remember me		
	ОК	Cancel	

If you receive a further pop up box warning about the identity of the remote computer select **Yes** or **Connect**

٩	Ċ	<u> </u>
	_	
Remote Desktop Connection	×	
The identity of the remote computer cannot be verified you want to connect anyway?	d. Do	
The remote computer could not be authenticated due to problems with it security certificate. It may be unsafe to proceed.	s	
Name in the certificate from the remote computer:		
Certificate errors The following errors were encountered while validating the remote computer's certificate:		
1 The certificate is not from a trusted certifying authority.		
Do you want to connect despite these certificate errors?		
View certificate		

Step 6.

Once your connection is established, you can start trading using your VPS
